Advantages:

1.USB3.0 HUB support USB3.0 transmission, backward compatible with USB2.0, supports up to 5Gbps data transfer rate,single port max output 5V/1.5A.

2.Type-C is easy to use regardless of positive and negative insertion.

3.Support Window2K/XP/2003/Vista/7/Wind8/8.1/10, Linux , Mac 10 OS system.

4.HUB and type-c port designed independently. If one port is broken,will not affect the normal use of other ports, greatly prolonging the service life of the product.

5.Over-temperature protection, when the temperature of enclosure exceeds 95 degrees, the power IC will automatically cut off the output.
